PROFESSIONAL SUMMARY

Software Developer with 2.5+ years of experience building full-stack web applications using React, Angular, Node.js, Express, Java, Python, and REST APIs. Experienced in developing responsive user interfaces, reusable frontend components, backend services, API integrations, and scalable applications in Agile environments. Strong background in JavaScript/TypeScript, frontend performance optimization, testing, Git-based collaboration, and building AI-enabled software solutions using AWS, Amazon Bedrock, RAG, and cloud-based development tools.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, HTML5, CSS3

Frontend: React, Angular, Vite, Bootstrap, Tailwind CSS, Responsive Design, UI Components, State Management

Backend: Node.js, Express.js, Java, REST APIs, API Integration, Authentication, Microservices

Databases: PostgreSQL, MySQL, MongoDB, Firebase Firestore

Cloud & DevOps: AWS, Firebase, Docker, Jenkins, GitHub Actions, Amazon Bedrock

Data & AI: Pandas, NumPy, TensorFlow, OpenCV, XGBoost, SHAP, Matplotlib, Generative AI, RAG, Claude, AI Agents

Testing & Practices: JUnit, PyTest, Jest, Jasmine, Karma, Mockito, Espresso, Agile/Scrum, CI/CD

Tools & OS: Git, IntelliJ, VS Code, Jira, Postman, Jupyter, Linux, Windows

PROFESSIONAL EXPERIENCE

RK Computer Software Inc

Software Developer

May 2025 – Present

Remote, Canada

Technologies: React, Angular, TypeScript, JavaScript, Node.js, Express.js, REST APIs, HTML5, CSS3, Bootstrap, Git, Jira, Postman

- Developed responsive frontend features using React, Angular, TypeScript, JavaScript, HTML5, and CSS3, improving usability and creating consistent user experiences across web applications.
- Built reusable UI components, forms, navigation flows, and dashboard layouts while following modern frontend development practices and responsive design principles.
- Developed backend services and REST API endpoints using Node.js and Express.js to support frontend features, user workflows, and application data exchange.
- Integrated frontend applications with backend APIs, handling request and response flows, form validation, error states, and loading states to improve application reliability.
- Collaborated with team members to debug UI issues, resolve API integration bugs, and deliver feature updates in an Agile development environment.
- Used Git, GitHub, Postman, and Jira for version control, API testing, task tracking, code reviews, and documentation while supporting fast-paced feature delivery.

Confidosoft Solutions Pvt. Ltd.

Software Developer

Jan 2022 – Aug 2023

Vadodara, India

Technologies: Java, Angular, Node.js, Express.js, REST APIs, PostgreSQL, Docker, Jenkins

- Led Angular-based client dashboard development, refactoring components for improved maintainability, accessibility, and frontend performance.
- Built full-stack application modules using Java, Node.js, Express.js, and Angular, supporting secure and scalable business workflows.
- Implemented RESTful APIs and integrated backend services with frontend components to support real-time application functionality.
- Developed reusable Angular services, components, and routing modules to improve code organization and application scalability.
- Configured Dockerized builds and Jenkins CI/CD pipelines to support automated deployments and consistent development workflows.
- Monitored application logs, resolved production issues, and improved application reliability through debugging and performance tuning.

Infolabz

Python Developer Intern

Jun 2021 – Jul 2021

Ahmedabad, India

Technologies: Python, REST APIs, Matplotlib, JSON, Data Visualization

- Automated data ingestion from external APIs with Python scripts and visualized results using Matplotlib.
- Developed COVID-19 monitoring backend with REST API integration, robust error handling, and retry mechanisms.

KEY PROJECTS

AI Cybersecurity Threat Analyzer – GenAI-Powered Log Analysis Platform

React · Vite · Node.js · Express.js · Amazon Bedrock · Claude · Titan Embeddings · RAG · Docker

- Built a full-stack GenAI cybersecurity platform using React, Node.js, Express.js, Amazon Bedrock, Claude, Titan Embeddings, and RAG to analyze security logs and classify threat severity.
- Developed REST APIs for log analysis, sample log retrieval, and AI-powered security assistant chat, improving usability for threat investigation workflows.
- Implemented contextual remediation recommendations, sample attack log workflows, and Docker Compose-based local deployment for easier testing and setup.

WoundVision – AI-Based Wound Assessment Web App

Python · Flask · OpenCV · XGBoost · SHAP · PyTest

- Built an AI-powered wound assessment web application using Flask, OpenCV, and deep learning models for wound segmentation and classification.
- Used XGBoost and SHAP to predict wound healing time and provide explainable AI insights.
- Optimized image preprocessing pipelines with OpenCV, improving inference speed by 40%.

EduEase – Education Management Android App

Java · Python · Firebase · ML · Espresso · JUnit

- Designed Android app with secure role-based login and Firebase Auth/Firestore/Cloud Functions for real-time academic data access.
- Integrated Python ML modules for student performance prediction, improving attendance analytics accuracy by 18%.

EcommProject – Angular E-Commerce Single Page Application

Angular · TypeScript · Bootstrap · Jasmine · Karma

- Built full-featured single-page e-commerce app with product listing, cart, checkout, and Auth Guard route protection; improved page load time by 30%.
- Structured application architecture using Angular services for centralized state management and API communication.
- Developed and executed unit and integration tests using Jasmine and Karma to validate core functionalities.

EDUCATION

Master of Applied Computing

Wilfrid Laurier University

GPA: 3.75 / 4.0

Jan 2024 – May 2025

Waterloo, ON

B.E. in Information & Communication Technology

Adani Institute of Infrastructure Engineering

CGPA: 8.71 / 10.0

Jun 2018 – May 2022

Ahmedabad, India

CERTIFICATIONS

Complete Python Bootcamp — Udemy

MATLAB Onramp — MathWorks

Getting Started with AWS Generative AI for Developers — Amazon Web Services

Generative AI Applications with Amazon Bedrock — Amazon Web Services
